

Hand Made Places Case Study

# Agar Children's Centre

MAY - SEPT 07

Agar Children's Centre in Camden North London first contacted Hand Made Places in late 2006. This was a brand new build site and after the initial few meetings it was agreed that Hand Made Places would take on the development of the entire outdoor area. This was a huge task and our team were eager to take on the challenge. Following close consultation with Camden Council and site staff our talented team came up with a wonderful design incorporating trim trail equipment, planters, sensory items, different surfaces, the list goes on and on. The result was a fantastic outdoor area that was zoned and yet free flowing, making the most of the space to provide educational and fun experiences for all the under 5's to enjoy.
