

Hand Made Places Case Study

# Pinmoor Children's Centre

JUN 09

Hand Made Places were contacted by Pinmoor Children's Centre with regard to the need to create an innovative and creative play and learning area for the centre's children. Hand Made Places designer's therefore created a magical sensory garden complete with planters, musical instruments and giant play sculptures. Children are now able to play freely and imaginatively within the garden. They may choose to explore the garden via the yellow path and arch bridge that crosses the blue river that has been created with the use of outdoor play carpet. A secondary learning area was also constructed in a previously redundant space, this now possesses work tables and adequate seating. Pinmoor's children now have an excellent resource with which to enhance their outdoor experiences.
